Have Fun with Colour

Your playground's colour palette influences how kids play (and how long they stay), as well as opinions of your space.

We've made it easy and cost-effective to get it right, with a choice of our four most popular colour combinations. Or you can great creative, and mix and match colours from our custom range.

Pick a popular colour combo

Environmental

Studies suggest that kids prefer playgrounds with natural materials and forms. Inspire imagination while encouraging interaction and extended playtimes – all while integrating beautifully with the natural environment.
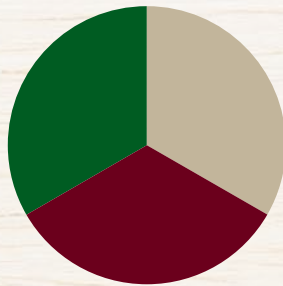

Simple and Fun

Want to grab their attention and stimulate the senses? Bright, primary colours scream 'fun' and appeal to all kids, especially the developing eyes of toddlers. These colours are all about energy and excitement!

Quirky and Colourful

If you want a playground that feels bold and original, a unique colour combination that 'pops' could be perfect. It's a striking palette that sets the scene for creativity and adventure.

Modern and Edgy

For a modern twist, choose sleek colours with an industrial edge. Attract children and impress adults by turning traditional play spaces into enticing (and almost architectural) destinations for great times that are on trend.
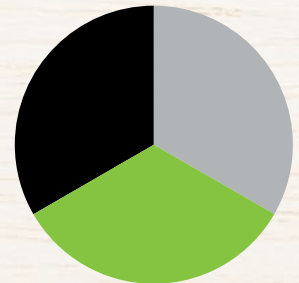

Or, choose custom colours to suit your style and space
